## Audley Junior School Blackburn, UK

### PRODUCTS USED: 2000 PUR

An eye-catching flooring design made up from complementary colours in Polyflor's 2000 PUR homogeneous vinyl collection is creating an attractive focal point for pupils at Audley Junior School in Blackburn, Lancashire. As part of a recent interior refurbishment, a series of circular designs have been installed into the school's main sports and assembly hall, creating an individual, fresh and modern look to encourage increased attention levels and promote learning.

Installed by AFB Flooring Solutions Ltd in Blackburn, this project required extra diligence through the intricate cutting of the vinyl on-site to create the inlaid designs fitted into a complementing main field colour. The school hall features a combination of three colours Glacier Blue 8450, Sapphire 8550 and Oak 8300, presenting an inventive interior space with the aim of creating a positive environment that can inspire the children during their regular sports classes and assemblies.

Susan Aldred, Head Teacher at Audley Junior School commented:

*"We are very pleased with the finished look and performance of the Polyflor flooring. The circular design looks really stylish and has certainly been a talking point for children and staff alike."*

Fran Bury, Director at AFB Flooring Solutions Ltd, adds:

*"We are proud to have been involved in this project and the finished installation looks worth the detailed effort that was put in on-site. We would particularly like to thank Polyflor's Design Service for their invaluable help in allowing us to turn this design concept into reality."*
