Couchbase office Manchester, UK

PRODUCTS USED: Camaro PUR

Polyflor's Camaro luxury vinyl tiles were installed in this state of the art, modern office interior for technology firm Couchbase.

The Camaro range was specified and installed by Ultimate Commercial Interiors Ltd who were the design and build fit out contractors on the project. They were tasked with providing a modern workspace which would stimulate innovation, creativity and energy.

Couchbase's new office is situated in Sevendale House, a Grade 2 listed building in Manchester's trendy Northern Quarter which has recently undergone a £6 million refurbishment to create new office space in the city centre.

The White Limed Oak shade from the Camaro collection was chosen for the office breakout area which features a kitchenette, seating and "Manchester Album Cover Wall" artwork.

This design perfectly complemented the interior's grey, white and red colour scheme and created a distinct separate zone for staff to spend their break times.

With a 2.0mm gauge and 0.3mm wear layer, Polyflor's Camaro range of wood and stone effect luxury vinyl tiles are suitable for light commercial applications such as small offices like this one and in boutique stores.
