## Middleton Technology School Manchester, UK

**PRODUCTS USED:**  
**Polysafe Verona**

Polysafe Verona PUR sheet vinyl flooring was installed at Middleton Technology School in Manchester as part of a recent school refurbishment. Polysafe Verona in the fresh hue of Summer Coulis 5217 has been used in serving and dining areas of the school refectory, adding a bright and uplifting feel to the dining hall.

Fitted into a specially housed structure separate to the main school building, Polysafe Verona was the flooring of choice due to its very heavy commercial classification and sustainable wet slip resistance. Specified by main contractor H Bell & Sons (Rochdale) Ltd and installed by Winton Flooring in Manchester, the flooring creates a welcoming and relaxing environment, suitable for pupils during lunch breaks.

Allison Crompton, Head Teacher at Middleton Technology School commented:

*"The motto at our school is 'in pursuit of excellence' and the installed flooring certainly fits our objective of having interior spaces that are fresh and project a positive ambience. As soon as we saw the new Verona range, we were impressed with the modern colours, particularly with the added benefit of slip resistance to give protection to our pupils. Our catering team is delighted with the end result, having picked the Summer Coulis shade at the outset to add some vibrancy to the area."*

Chris Bell, Director at H Bell & Sons (Rochdale) Ltd adds

*"We are very happy with this safety flooring installation. The Verona range ticks the box perfectly and ideally complements the use of natural wood tones and overall angular style of the building which has leanings to contemporary Scandinavian design principles."*
