

Education

Cheshunt School Hertfordshire, UK

PRODUCTS USED:
Mystique PUR, Prestige PUR,
Polysafe Mosaic PUR

Hardwearing commercial vinyl flooring from Polyflor's safety and homogeneous flooring collections was recently installed through new facilities at Cheshunt School in Hertfordshire.

Approximately 2000m² of flooring from the Mystique PUR, Prestige PUR and Polysafe Mosaic PUR ranges was fitted at the secondary school by flooring contractors Flortec Ltd working for regional construction company Beard.

Ideally suited to busy education environments, Mystique PUR in Titanio was used in classrooms while Prestige PUR in Grey Marl was chosen for corridors, staircases and other circulation areas.

Polysafe Mosaic PUR safety flooring in Grey Fusion was selected for use in the school's science classrooms and toilets areas. This high specification, decorative safety vinyl flooring combines the assurance of sustainable slip resistance with high durability for years of performance.
