Copperfish Swansea, UK

PRODUCTS USED:
Affinity255 PUR, Polysafe Apex

Wood effect luxury vinyl tiles and hardwearing Polysafe safety flooring from Polyflor were chosen to create a nautical inspired interior design scheme for Copperfish bar, restaurant and takeaway in the seaside destination of Mumbles Pier in Swansea, Wales.

Local contractors Pro-Spec Interiors Ltd installed Polyflor flooring in front of house areas and behind the scenes at Copperfish, which serves traditional fish and chips in their takeaway as well as cocktails and burgers in their bar restaurant.

Heavy commercial Affinity255 PUR luxury vinyl tiles in the rustic Cross Sawn Timber design were used for most of the restaurant floor area, with random planks of the Aspen Pine and Flamed Chestnut designs added in to create a unique reclaimed timber look.

Polysafe Apex safety flooring in the Breccia and Chromite shades was used in the back of house kitchen areas, behind the bar and around the takeaway servery.

Bert Bollom, Director at Mumbles Pier commented, "Polyflor flooring has helped us add the finishing touches to our new Copperfish restaurant which is a fantastic new addition to Mumbles Pier. Customers have been commenting on the interior design scheme and saying how much they love it."
