PRODUCTS USED:
Expona Control

Expona Control, Polyflor's ground breaking new flooring concept has been installed at the prestigious Slattery Patisserie and Chocolatier. Developed for use in busy commercial areas, Expona Control is the first flooring product of its type, combining the design benefits of a Luxury Vinyl Tile (LVT) with the sustainable slip resistance of an HSE compliant safety floor. Installed by Manchester based Winton Flooring, over 300m² of Expona Control's Cambrian Stone featured in the renovation of the ground floor. John Slattery, owner of the business comments;

"Due to the heavy footfall we experience and the climate in the North West of England, we required a design-led flooring with sustainable slip resistance to ensure the safety of my customers and staff. Expona Control was the obvious choice".

Expona Control is fully HSE compliant, offering the same slip resistance specification as Polyflor's market-leading Polysafe ranges.
