The LiquorLab Telford, UK

PRODUCTS USED: Affinity255 PUR

Heavy commercial Affinity255 PUR luxury vinyl tiles from Polyflor were recently chosen to complete the stylish interior design scheme at The LiquorLab, a new cocktail bar at the Southwater development in Telford, Shropshire.

The LiquorLab is Southwater's first cocktail bar, with a laidback, industrial inspired design scheme created by local commercial kitchen and interior fit out company Catering Centre UK.

Affinity255 PUR luxury vinyl tiles in the Huckleberry Oak shade were installed in the lounge, seating and bar areas to create an inviting space for customers to socialise in. The luxury vinyl tiles were straight laid in the main seating area and laid in a herringbone pattern in the raised seating area. Huckleberry Oak features rich hues in a realistic wood effect design with intense grain detailing and authentic surface textures.

Matt Taylor, Owner of The Liquor Lab commented, "We're delighted with the finished look of the bar as the flooring perfectly complements the modern, stylish décor and furniture. Our staff also find the flooring easy to clean and maintain everyday."
