

Education

St Wilfrid's Church of England Academy Blackburn, UK

PRODUCTS USED:

Expona Design PUR, Polysafe Modena PUR

Flooring products from two of Polyflor's ranges were chosen to help refurbish the school hall, classrooms and corridors at St Wilfrid's Church of England Academy in Blackburn.

Over 1400m² of Expona Design PUR luxury vinyl tiles and Polysafe Modena PUR safety flooring was installed by local flooring contractors Rishton Floorcraft Ltd at the mixed secondary school and sixth form.

The grey wood effect Silvered Driftwood shade from the Expona Design collection covered 600m² in the school's busy dining hall. Polysafe Modena safety flooring in the Galena and Jetstone shades were installed to provide sustainable wet slip resistance in the academy's classrooms and corridors. 21 rolls (840m²) of flooring was used with light grey Galena as the main floor colour and the darker Jetstone to create contrasting borders.
