# **Polysafe** Quattro

BAREFOOT & SHOD, WET & DRY

ENVIRONMENTS.

Education

# Designed for **HIGH RISK** environments

Polysafe Quattro has been specifically designed to provide a high degree of slip resistance whether wearing footwear or being barefoot in continually wet areas where additional contaminants such as shampoo and shower gels may be present.

The choice of floor covering in healthcare, aged care and specialist care environments can have a significant impact on the health and well-being of residents and staff. Quattro has been designed to enhance interiors, offering a practical solution where people can feel comfortable and safe. Quattro can also make a difference in education and leisure environments, where changing rooms, wet rooms, spas and pool sides require a high degree of slip resistance.

Quattro has been engineered to achieve a pendulum wet test result of 50+ (Slider 96), most importantly this performance is sustainable and assured throughout the product's guaranteed life.

**Adapted Living** 

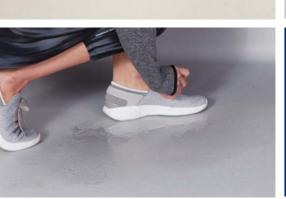

Healthcare

**Social Housing** 

Leisure

Choosing the right flooring is key in promoting a more positive and inclusive environment to those living with dementia.

Designs that promote harmony and wellbeing through the creation of a sense of calm are important to resident comfort and welfare. Generating this harmonious feel is equally important whether in a residential care setting or within a person's home to support independent living. With this in mind, the Polysafe Quattro colour palette has been carefully developed.

A surface, without studs, offers superior comfort underfoot whilst maintaining high performance and safety. Residents and their carers can have confidence that their floor covering provides sustainable wet slip resistance offering protection against slips, trips and falls.

- Enhanced comfort underfoot
- Designed for residential care settings
- Safety assured
- Easy to maintain

# THE **COLLECTION**

The Quattro collection draws from the calm beauty within natural environments, evoking memories of a revitalising coastal scene. The collection features warm neutrals reminiscent of sandy dunes, fresh blue shades reflecting gentle ocean waves and soothing grey tones inspired by rocky coastlines. These hues work in perfect harmony to create an ambiance of tranquillity and calmness.

## RECOMMENDED FINISHES

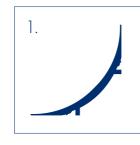

To achieve a perfect finish, it is advisable from the outset of any project to consider appropriate drainage and floor to wall detailing.

### + Watertight floor to wall finish

In continuously wet areas the appropriate floor to wall finish is equally as important as choosing the correct floor. To ensure that a watertight joint is achieved we recommend that Quattro is site-coved to the wall.

Cove formers [1] & capping strips [2] give a neat finish to the installation and ensure a continuous sealed surface.

Watertight

Durable

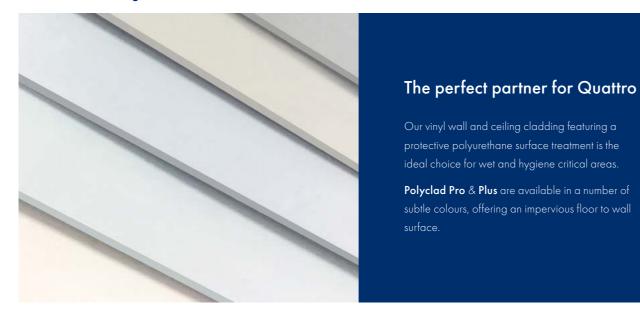

Easy to clean

+ For more information on capping or coving designs and sizes please contact us.

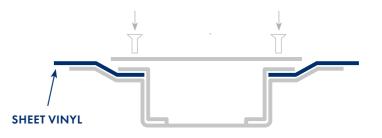

### + Wall Cladding

Hygienic

### + Drainage Systems

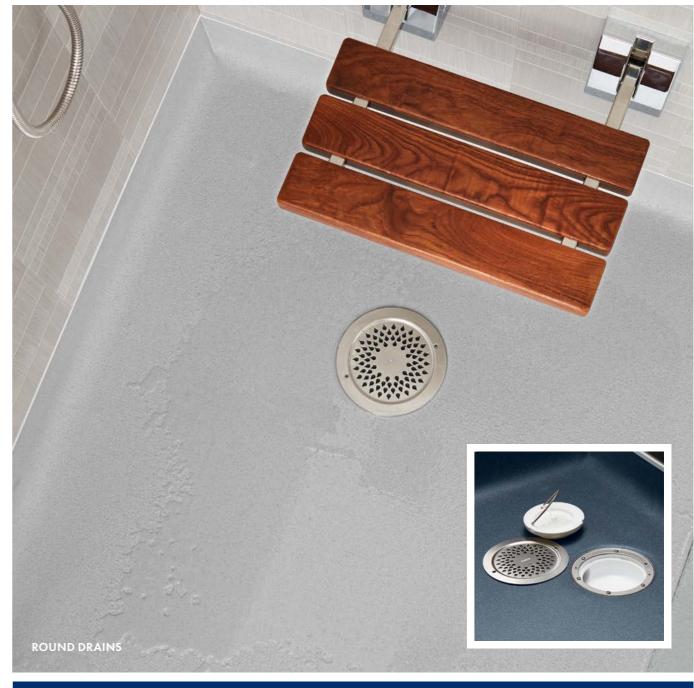

Only drains that have been specifically designed for use with sheet vinyl flooring should be considered in wet areas. These drains have clamping rings which prevent the ingress of water to provide a watertight finish.

The vinyl can easily be clamped between the drain's grate and build-in set to ensure a complete watertight installation.

lacktriangle For more information on suitable drainage systems please contact us.

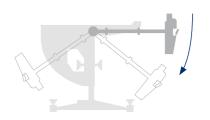

## PRODUCT **TESTING**

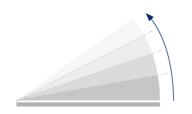

As the potential for slips is higher in wet environments, it is important to choose a HSE compliant flooring solution that offers sustainable slip resistance for the product's lifetime.

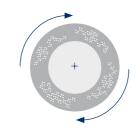

Quattro achieves a test value (PTV) of **50+** (Slider 96), ensuring a low slip potential.

In Australia this result means that Quattro is **P4** rated.

### EN 13845 The European safety flooring standard

Conformance to the 50,000 cycles abrasion test demonstrates that the performance particles within a safety floor are durable, offering longevity and sustainable performance for the guaranteed life of the product.

- Easy clean
- Maintain cost savings
- Optimum appearance retention
- Resistance to staining & chemicals

## TECHNICAL SPECIFICATION

Gauge	EN 428/ISO 24346	2.0mm
Roll Size	EN 426/ISO 24341	$2m \times 20m = 40m^2$
Total Weight	EN 430/ISO 23997	2700g/m²
General Performance	EN 13845	Conforms
	ASTM F1303	Conforms
Use Area	EN 685/ISO 10874	
Resistance to Chemicals	EN 423	Good chemical resistance
Water Tightness	EN 13553	Annex A
	EN 13501-1	Class Bfl-S1
Reaction to Fire	ASTM E648	Class 1
	Australian BCA Spec C1.10-3	Complies
Abrasion Resistance	EN 13845	50,000 cycles
	EN 649	Group T
Enhanced Slip Resistance	EN 13845	ESb & ESf
•	AS 4586 Appendix A	P4

		AgBB VOC test	Pass
<b>SSSSS</b>	VOC Emissions	Floorscore	Certified
		Finnish M1 Classification	Certified

Environmentally Preferable Flooring - Polysafe Quattro PUR achieves BRE Global Environmental Generic A+ rating in major use areas such as education and healthcare. Generic EN 15804 Environmental Product Declaration (EPD) available on request. It is 100% recyclable and contains recycled material. Recyclable via the Recofloor scheme. Visit www.polyflor.com/sustainability.

Polysafe PUR - Polysafe Quattro PUR features a high quality, cross-linked polyurethane reinforcement, UV cured to provide superior cleaning benefits, life cycle maintenance savings and optimum appearance retention. As with all Polysafe products, Polysafe Quattro PUR should not have a polish applied.

Hygiene - All Polyflor commercial sheet vinyl ranges provide a continuous, impervious and hygienic flooring solution which can be confidently cleaned in accordance with recommended maintenance procedures and approved maintenance products. The implementation of an effective cleaning regime is the most important defence against infection.

Polysafe safety flooring ranges have good resistance to dilute acids and alkalis, are compatible for use with the most commonly used alco-based hand gels and are suitable for steam cleaning on a periodic basis. Chemical resistance charts available on request. For information regarding handling and installation, adhesives, maintenance, applications, chemical resistance and product warranty, consult Polyflor Customer Technical Services on +44 (0) 161 767 1912, or email tech@polyflor.com.

The data presented is correct at the time of printing. For latest information, please visit our website polyflor.com. This product contains a blend of quartz particles in various colours within the vinyl to impart the required sustainable slip resistance. Decoration and shade may vary slightly from the samples shown.
